

Engineering Technician

Ibeos is looking for highly motivated individuals to join our team as we continue to provide advanced electronics and subsystems to cutting edge satellite and rocket programs. Ibeos is growing fast, and we have excellent opportunities for professional growth. Our projects push the performance envelope for both power and digital applications in space.

Your Job

An Engineering Technician supports a wide range of projects at Ibeos. Specifically, the engineering technician supports manufacture, build, and test of Ibeos' existing product lines; assembly of Ground System Equipment; prototype units manufacture; maintenance of lab equipment; and maintenance and periodic update of procedures. The Engineering Technician has ample opportunity for growth as you expand your skillset and become more familiar with company products and processes.

Desired Skills and Experience

Ibeos is interested in individuals with skills in one or more of the following areas:

- Soldering of electronics circuit boards and components (required)
- Testing of electronics using equipment such as oscilloscopes, frequency analyzers, thermal chambers, power supplies, etc.
- Calibrating and tracking test equipment such as oscilloscopes, frequency analyzers, test chambers, multimeters, etc.
- Mechanical assembly of flight hardware, including batteries, boxes, chassis, etc.
- Experience in a high-reliability environment, such as aerospace, or medical equipment manufacturing preferred

U.S. Citizen

Why Ibeos?

Ibeos was founded in 2013 with the goal of developing high-reliability spacecraft electronics at affordable costs and on aggressive schedules. Ibeos' hiring philosophy, which is key to delivering on this goal, is to pay above market for exceptional engineering talent. As a member of our team, you will have the opportunity to work with an efficient, talented team on exciting and challenging design projects. We pride ourselves in a relaxed, open, and creative work environment. Our location in the DC metro area is conveniently located at the Reston Town Center Metro station opening in late 2022, with an easy commute to excellent communities for both families and young professionals.
